MEMORANDUM FOR: Chief, Defensive Systems Division, OSI

ATTENTION: [REDACTED] Anti-Ballistic Missile Branch

SUBJECT: Ground Photographs of Dual Hen House Under Construction

1. The initial foundation excavation for the Sevastopol Dual Hen House Radar has been identified in a sequence of long focal length, ground photographs taken in [REDACTED] which show installations along the Black Sea Coast (Enclosure 1).

25X1A

2. The first evidence of construction of the Sevastopol radar was observed one month prior to the date of this photography, on satellite coverage in [REDACTED]. Thus no structural elements were visible in the ground photography. Although only piles of earth from antenna and control building foundation excavations can be seen, this represents the only known photography of a Dual Hen House radar complex not restricted by TALENT-KEYHOLE controlled classification.

3. The location of the Sevastopol Dual Hen House has potential for future collection efforts (Enclosure 2). When seen on satellite photography of [REDACTED] the radar was nearing external completion and the large structure should now be readily visible from ships passing near Sevastopol on the Black Sea.

4. Questions regarding this memorandum may be directed to [REDACTED] of the Missile Systems Division, IAS on extension
